## Generator Rebuild Service

A healthy generator can be the difference between being stuck on the side of the road, or getting home from an enjoyable ride. Unfortunately age and lack of use work together to make generators fail. Often owners of older vehicles are too ready to simply replace an original generator with an aftermarket unit or an alternator on an otherwise stock vehicle. In doing so they frequently find that new problems have been created, in addition to losing originality. The Ford Motor Company was very careful to install high-quality generators that were specifically matched with the other components as original equipment. This rebuild service is designed to bring your correct, rebuildable generator into the 21st century and give you years of faithful service. It includes a thorough cleaning, the wear-items are replaced, the internal settings are brought to factory specification, and it will be given a cosmetic restoration. It will be ready to bolt on with a minimum of work. Simply read the service form and follow the instructions. Our experts will take care of the rest and return your generator ready-to-go! Your can count on MAC's for the parts and services you need!

## INTERIOR PARTS AND TRIM

3

Installing these correct factory-type seat covers requires skill, experience and a few special tools. Some hobbyists are indeed able to satisfactorily install their own, but for best results, we recommend that these quality seat covers be taken to an experienced professional trim installer.

Be aware that the term "seat covers" as used in this catalog refers to the authentic-style, correct replacement upholstery for the seats in your original Ford car. Don't confuse them with the cheap "dime-store" seat covers that are sold to fit over factory upholstery.

### Front Bucket Seats

Finally... Reclining seats for your classic Fairlane! MAC's and distinctive industries are proud to offer the Touring II seat; a true revolution for restoration and the resto-mod movement. Touring II seats feature Procar® by Scat seat frames and high-bolstered foam. The high quality seat frames are TIG welded then powder coated for long life and durability. They feature a total of 20 reclining positions and 18 sliding track positions for excellent adjustability. Touring II seats are true industry innovations, as they are specifically designed for high bolstered foam, rather than just foam added to an unsupported seat frame. Authentic-looking seat upholstery is used that mimics the original interior design without looking out of place. Did we mention that the Touring II seats actually recline? Now there's a solution for this decades-old problem! Touring II seats are drop-in options for your classic Fairlane restoration or resto-mod project, with the added benefit of matching distinctive industries' interior products. Seat yourself in the comfort and style of the Touring II seat...and finally recline.

## Hog Ring Pliers and Rings

We offer high-quality hog rings and pliers for those who are skilled at installing their own Fairlane or Torino seat covers. However, unless you have done this job before, we recommend that you take our premium seat cover sets to a professional trim installer for best results. Their many years of experience have taught them countless techniques for getting the proper fit, without unnecessary wrinkles, sags, or other little imperfections. So unless you are experienced at installing reproduction automotive seat covers, search for a professional installer near you.

*Installing these correct factory-type seat covers requires skill, experience and a few special tools. Some hobbyists are indeed able to satisfactorily install their own, but for best results, we recommend that these quality seat covers be taken to an experienced professional trim installer.*

*Be aware that the term "seat covers" as used in this catalog refers to the authentic-style, correct replacement upholstery for the seats in your original Ford car. Don't confuse them with the cheap "dime-store" seat covers that are sold to fit over factory upholstery.*

## Attention Fairlane Owners

If you own a 68–70 Fairlane 500 and are looking for seat covers, we have a possible solution for you: our Torino seat covers will fit! The trim is a bit different, but the seat covers themselves are the same size and shape. If you are building a “concours correct” car, these are not the seat covers you need, but for a “driver” or weekend cruiser you’ll find them both functional and good looking.

MAC's is the source for quality molded armrests for Ford vehicles. All of our armrests are identical to the original Ford part in every way except for one difference, ours are made to last! These use modern technology to manufacture a product far superior to the original Ford piece in durability. All armrests feature steel core for proper mounting and support. Our armrests also feature energy absorbing foam filling for the original soft padded feel. We now offer our quality armrests in selected colors. Don't settle for a lower price alternative, get the best. There is a difference!

## 1970–71 Door Panels

Just like the originals, these door panels feature heat sealed vertical pleats and a chrome mylar rectangle. They are correct for the standard Ranchero, as well as the "500" and "GT" models.

Headliners

The Fairlane and Torino headliners listed in this category cover the years from 1962–71. There were four types of vinyl headliners used during this time span: raised star, perforated, crater (or “moonskin”) and tier. MAC’s new raised star vinyl was original in 1962–63 as well as our perforated vinyl, which is available in three colors. Crater vinyl was used in 1964–70 and is available in seven colors. Tier vinyl was used in 1971 only and is available in four colors.

## AcoustiSHIELD

Acoustishield is a multistage thermal-acoustic insulation and sound damping system to give older cars and trucks the "quiet riding comfort" found in today's new vehicles. Using "state-of-the-art" auto acoustic technology, and a combination of Dynamat Xtreme sound damper pads and pre-cut heat shield insulation panels, these kits will reduce road noise, exhaust harmonics, mechanical noise, body panel vibration and the effects of radiated and reflected heat. Passenger cabin noise levels are reduced by approximately 50 percent and interior heat is virtually eliminated kits are year, make and model specific, and are pre-cut to exact shape for each area covered. A complete vehicle acoustic kit includes the cowl, floor, roof, trunk, doors and body panels, seat divider, package tray, wheel wells, etc. Our complete kits are model specific and include everything you need to do the job right: Dynamat, heat shield, spray adhesive, seam tape, and easy to follow illustrated instructions. These kits are made to order, please allow 2-4 weeks for delivery.

## Vinyl Dash Pad

This is a brand new reproduction dash pad for the iconic 1966 Fairlanes and Rancheros. It is built in the USA by skilled craftsmen that care about the quality of the product and how it relates to the customer. They use an ABS skin molded to high tech soft flexible foam that has a much better resiliency than the older semi-rigid offerings that are common on the market. The defroster openings are formed, and the speaker holes are pre-drilled. Mounting studs are formed into the ABS plastic substrate on the bottom of the pad. Each pad is fitted to a fit check fixture, a genuine steel dash shell removed from a factory vehicle.

## Ranchero/Torino/Montego Console Body

Our reproduction console body looks exactly like the original and features the original corinthian grain texture and the unique stitch design on the top rails. Stronger than original plastic which is prone to cracking, this part is made of hand-laid fiberglass. This is the console body only, you will need your original shifter plate, upper tray and console lid to attach to this new body, or you can buy a new lid from US (part # 42-42918). Manufactured in white, must be dyed to match (picture shown is dyed black for example only). Made in the USA!

## 'High Performance' K-Code Fender Emblem Backer

Having a rare vehicle is both exhilarating and challenging. This sentiment, expressed by one of our valued customers, began a six-month project which LED to US being able to offer this amazing fender engine size call-out emblem backer.

These were originally found only on Ford Fairlanes built in 1963 and 1964 with the venerable k-code 289. We offer many of the 'V' shaped engine size fender emblems, including the 289 emblem this was originally used with. It will look and work great with any, and is sure to be a great conversation-starter with anyone who appreciates rare parts.

## Fiberglass Bumpers

We carry a complete selection of fiberglass body parts for Ranchero, Fairlane, and Torino. All of our fiberglass parts are made of high quality fiberglass sheeting and are manufactured to fit and appear like your original sheet metal part. Fiberglass bumpers are not chrome, and will need to be painted. These are high quality parts manufactured in the USA! Please see our MacsAutoParts.com for applications.

**Note:** Fiberglass body parts will not provide the same level of protection in the event of an accident as steel will. Fiberglass parts are not recommended for street driven vehicles. MAC's assumes no responsibility whatsoever for injury or damages that may occur from the usage of these parts.

These parts are oversized and require additional shipping charges.

## Fiberglass Doors

- Styled like original steel doors
- Accept all hardware (handles, vent windows, window regulators, etc.)

These doors fit just fine on 2-door hardtops or convertibles, and can have original parts attached to them. Like all fiberglass replacement parts, they will likely require some finishing prior to painting and final installation. It is highly recommended that you put them on the hinges and install the latches to see how they fit. Once they are modified, including painting, we can't take them back. With this, and relatively minor detail work they look amazing!

## Convertible Tops

ALL of our tops are constructed from heavyweight 32-36 ounce premium quality double thickness vinyl and carry a 5-year warranty. Due to the difficulty of installation, the warranty is void if the top is not professionally installed. Installation instructions can be found in factory manuals.

Our tops feature 36oz. Vinyl coated on cotton sateen lining. Seams are dielectrically heat sealed and are cut to exact standards for superior fit. Material is reinforced at all the stress areas. We use pinpoint grain as original. Colors are keyed to original shade. Matching binding is used for all materials. Polyester bonded Dacron thread is used. Comes with a 5 year manufacturers warranty (prorated). Available colors: black, white or tan. Specify color when ordering.

**NOTE: Do not clean plastic windows with paper towels, scratching damage to windows will occur.**

**OS** Convertible tops with rear glass window are **OVERSIZED** items and require an additional freight charge.

## Convertible Top Boots

- Features original colors
- Vinyl texture
- And attachment
- Instructions and snap kit (if needed) included

We offer these exact reproduction top boots which are available in most factory colors. They are made from original Ford patterns for an original fit. All boots feature original grain materials, correct colors, foam backing material and stainless steel snaps where original. We have learned that there is variation in snap placement on certain cars so the included snaps are not installed. Adding them is an easy process, and it makes for a much better fit.

### Small Block V8 Oil Pan Conversion Kits

These dual-sump oil pan kits include the major components you will need to install a 1969-97 small block Ford into your Fairlane, Torino, or Ranchero. A dual-sump oil pan design is often required for proper steering and crossmember clearance. Included is a 5 quart capacity steel oil pan, oil pick up tube, oil dipstick and tube, as well as a main cap stud. Choose your-style; the oil pan is available with a standard black finish, durable zinc plating, or bright chrome. Oil pan gasket and oil pan bolts are not included.

## ZDDPlus Oil Additive

ZDDplus restores ZDDP (zinc) to the level that existed when your classic car engine was designed. Adding a 4 oz. Bottle each time you change your oil will significantly reduce camshaft wear. It's compatible with all the new formula high-quality oils, so add ZDDPlus to your oil change routine and give your engine the protection it deserves.

## Billet 1-Piece Alternator Pulley with Fan

• Billet pulleys are machined in the USA from 6061-T1 billet aluminum  
• The industry's only one piece alternator pulley with fan

With a cast pulley, the aluminum is poured into a mold and then allowed to cool. This process can create variations in density throughout the pulley. Dense areas are heavier than the more porous areas causing the pulley to vibrate at high RPM. Our billet pulleys are equally dense throughout; equal weight translates to a true and balanced pulley drive system. Machined in the USA from 6061-T1 billet aluminum, this features a bolt on nose cone to hide the alternator nut and washer. We offer the industry's only one piece alternator pulley with fan!

## Transmission To Block Spacer For FE engines

- 1/8" Steel
- Provides correct separation between block and bell housing
- For all FE engines, 352, 390, 427, 428

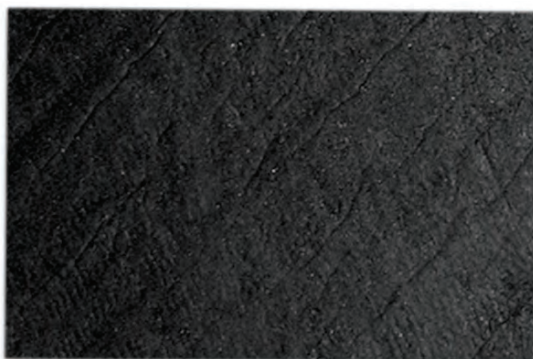

If you are combining a Ford FE engine with a manual transmission you really need one of these spacers. Like the originals, these are 1/8" thick and simply go between the block and bell housing. This also puts the starter in the proper relation to the flywheel. They are held in place by the same bolts that hold the bell housing to the block. These are gold iridized, so that 1/8" you can see looks great! In all seriousness, this coating will keep your new spacer from corroding.

## Fairlane Air Cleaner Base

This is an exact reproduction of the 1969 Q-code 428 Cobra Jet (non-shaker) air cleaner base made exclusively on new Scott Drake tooling.

The Q-Code 428CJ engine was available in Mustangs, Fairlanes and cougars. This base features precise stamped steel construction with the correct snorkel opening, breather port, three mounting studs, and a port for the vacuum operated air inlet door.

The base is finished in authentic Ford corporate blue. Like all Scott Drake products, it is also backed by the Scott Drake 100% satisfaction guarantee.

## PerTronix HEI Distributors for Small Block

- Coil in cap technology
- Tower cap allows for aftermarket-style spark plug wires
- Features a new aluminum housing

The HEI system uses the coil in cap technology for a cleaner, self contained installation. The tower cap allows for aftermarket-style spark plug wires and affords better contact between the cap and plug wires. Distributor features a new aluminum housing machined from a384 alloy and comes complete with dielectric strength cap, solid brass terminals, low resistance center coil brush and high performance mechanical advance curve kit with precision stamped weights and center plate. Legal in all 50 states. (Carbeo #D-57-5) limited 1 year warranty. Cap measures 6.295" wide and 9.482" from intake mating surface to top of coil. ## PerTronix Billet Distributors

This plug-n-play billet vacuum advance and non-vacuum advance distributor is for small block Ford applications. Provides maximum ignition performance and easy installation. Features the patented Ignitor II electronic ignition module and a CNC machined 6061 t-6 polished billet housing and deck. PerTronix electronics is also compatible with any inductive ignition system coil, but high RPM performance can be improved when used with a low resistant (0.6 Ohm) Flame-Thrower II coil (42-11286-1). If you are using a multi-spark CD ignition box, no problem, the Flame-Thrower billet distributor is compatible. Legal in all 50 states, and Canada.

## Distributors

Put some pep back into your Ford engine with a new remanufactured distributor. Experienced tune-up specialists will tell you that worn or sloppy old distributors shafts, bushings, gears and vacuum diaphragms are common causes of those mysterious ignition problems we have all tried to troubleshoot. Eliminate all doubts with one of these guaranteed quality rebuilt units.

The remanufactured distributors listed below are sold on an exchange basis. If your rebuildable core isn't received before we ship, you will be charged a \$50.00 Core fee. This core fee will be refunded if your acceptable exchange is received within 90 days of your purchase date.

## Flame-Thrower II Coil Systems

Improved high performance flame thrower ii coil increases to 45,000 volts and features low 0.6 Ohm resistance. This coil is compatible with capacitive discharge systems (CD box). When used with the Ignitor II ignition, creates a 479% improvement at 3000 RPM over stock coil. More spark energy, with voltage to burn! This new flame thrower coil allows higher voltage which allows larger spark plug gaps for added power, smoother response and better fuel economy. This coil is used with Ignitor I ignition systems and cannot be used with standard ignitor.

## PerTronix Ignitor Solid State Ignition System

This system is great! The Ignitor is a breakerless solid state ignition that fits inside your standard distributor and is completely self contained. Allows your car to start fast every time, reduces battery drains, improves fuel economy and stretches spark plug life tremendously. And best of all, it installs in 10 minutes! 30 Month factory warranty. Specify model when ordering.

## PerTronix Ignitor-2 Ignition Systems

Millions have upgraded their point-style ignitions with the Ignitor electronic module, gaining horsepower, quicker starting and longer plug life. Ignitor II takes it a step further by adding a powerful new microcontroller that controls the dwell period for the best possible spark over the entire RPM range. Ignitor II offers enhanced performance levels only found in more expensive "box-type" ignition systems. It fits entirely inside the distributor for the stock look, installs easily, and you'll never change or adjust your points again!

## Ignitor II Ignition Kit

This is a great kit which is appropriate for most Ford V8 engines made between 1957-1974. The most significant component included is the PerTronix Ignitor I point eliminator. You can take performance one-step higher with the Ignitor II. The dwell is constantly monitored by a new microcontroller and adjustments are made to maintain peak efficiency throughout the entire RPM range.

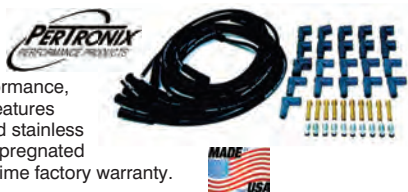

Best of all you never have to replace points again while maintaining a stock look. Next is a low-resistance (0.6 Ohm) PerTronix flame thrower ii coil. The Ignitor II needs a coil with this resistance, and the flame thrower ii produces up to 45,000 volts for a powerful, clean spark. Since it is black, the sticker can be removed for stock looking engine compartments. The tailored black PerTronix flame thrower spark plug wire set will transmit that spark through two current paths to your spark plugs (we chose not to include spark plugs in this kit because the proper spark plug to use varies widely depending on application and engine capability). No tune-up is complete without a quality distributor cap with brass contacts for sure spark and long life. Finally, a matching quality rotor is included.

## C4 Transmission Oil Dipstick and Tubes

Designed for accurate fluid reading and easy access, these filler tubes have the "no leak" hat seal and lock top stick. Since many transmissions build up pressure, the lock top stick helps prevent fluid from blowing out of the dipstick and going everywhere. These dipsticks and filler tubes are available in a variety of transmission-types.

## Clutch Fork Anti-Rattle Spring, and Fork Brackets

This spring is mounted on the clutch fork and helps prevent rattle when the clutch is not engaged. The pivot is manufactured in the correct thickness as the original, something unobtainable in reproductions. This pivot mounts to the inside of the bellhousing and is often overlooked during clutch or transmission replacement or repair.

## Centerforce Clutch Systems

Centerforce brand clutch systems are the best performing clutches you can buy for your classic Ford. Allows for stock installation with unparalleled frictional performance without heavy pedal feel. Performs better than stock clutches due to the use of centrifugal force which actually increases holding power as RPM increases, and offers 30% more holding capacity than a stock original equipment clutch. Notes: use 42-75463 or 42-75464 for correct throw-out bearing. See note below on the 42-75462 kit.

## Column Shift Control Selector for 3-Speed Automatic

- Reproduction of original in 3-speed automatic cars
- Can be used to convert columns of original 2-speed cars
- Has saved many restorers from replacing their whole column

This new heavy duty steel reproduction of the original selector insert for 3-speed automatic cars is located in the shift collar. This small piece when worn or broken will cause that loose feel when changing gears. We recommend replacing the shifter arm and shift collar at the same time for a tight new shifter. If you have upgraded your 2-speed automatic car to a 3-speed automatic this piece perfectly replaces the 2-speed selector and allows you to keep the original column. **Note: this will not work for cars still using the 2-speed automatic**

## Performance Automatic "Super Streeter" C4 Transmissions

- Heavy duty clutches
- Street strip valve body
- High performance bands
- Pro shift servo
- Deep aluminum pan
- One year warranty
- Select from pan fill or case fill

Ford had a tough little transmission with the C4 when it debuted in 1964. Performance Automatic took over from there and turned this compact 3 speed into a unit that can withstand horsepower! They offer the country's most respected performance transmissions and warranties that can't be beat! Performance Automatic introduced the Super Streeter transmission line many years ago to satisfy the demands of a growing segment of street machines. The Super Streeter is equipped to handle horsepower. Firm, crisp shifts, heavy duty clutches and bands, along with complete installation instructions, are just some of the features standard on the famed C4 Super Streeter.

## Performance Automatic Street AOD Transmissions

- Built to handle up to 450 HP
- Heavy duty clutches
- Wide band diode pack
- Street strip valve body
- Chrome pan
- Heavy duty 3/4" clutch pack
- Tv pressure cable
- 2200-2400 Stall
- Dipstick and fill tube
- Lifetime warranty

This AOD transmission is a proven winner when it comes to non-computer controlled 4-speed overdrives. Upgraded internals like an extra wide overdrive band, diode sprag and extra 3-4 clutches combined with a shift improvement package make this an excellent swap into an earlier Ford. Dyno tested and given lifetime warranty, these units are perfect as a replacement on any vehicle.

## Performance Automatic C4 Transmission Bellhousings

- Cast from high strength aluminum alloy
- SFI 30.1 Certified
- Add on for C4 single trans. Assemblies

For almost a decade, Performance Automatic has produced an incredibly versatile line of pro fit bellhousings. What makes this bellhousing so unique is that it is part of the Performance Automatic Pro-Fit system. This bellhousing is CNC machined to accept the 157 or 164-tooth flexplates and starters, thus eliminating any guesswork when installing.

## Grizzly Lockers

We have Yukon Grizzly Lockers for Ford 9" differential with 28-, 31- or 35-spline axles. Mechanical positive-locking differentials have been the staple for drag racing, circle track racing, off-road use and a variety of other performance applications for decades. We now offer the Grizzly Locker, the latest in locking differentials. The Grizzly Locker features a forged case, 8620 internals and a patent pending design which reduces common locker failures. These units provide maximum traction and strength for many performance applications. Grizzly Lockers are available for a variety of car and truck applications, with new applications being added all the time! Assembled in the USA!

Can there be a more overworked or more under appreciated part of your Ford than the lowly motor or transmission mount?

Every time we rev our high-powered Ford engines, the poor mounts are stretched almost to the point of tearing apart. Every little oil leak seems to find its way to the sensitive rubber part of every mount, while exhaust and engine heat combine to cook mounts into an early grave. Yet, these motor and transmission mounts have the vital tasks of keeping our drivetrains properly centered and safely anchored under every condition, while also isolating engine vibrations from the chassis and passenger compartment.

## Motor Mounts (2 required)

## EPAS Performance Electric Power Steering Conversion Kit

- Complete EPAS performance electric power steering conversion kit
- No major or irreversible modifications are made to your Fairlane/Torino
- Kit includes 60 amp electric motor
- Mounting hardware
- Rewired control module and installation instructions

The computer measures the amount of effort on the steering wheel and amplifies it with the aid of the electric motor. A potentiometer (adjustment knob) allows you to have more or less assistance, so you can adjust the amount of power assist. For example, you can have maximal power assist on a parking lot, and less on the highway. Why you need it: most new cars have electronic power steering because you don't need belt drive power steering pumps, hoses to transfer fluid, or potentially leaky hydraulic steering box or rack.

## Power Steering Pump Rebuild Service

- Your rebuildable core thoroughly rebuilt and returned
- Will work like new again

We are proud to offer this top-quality rebuild service. Simply remove your reservoir, drain the fluid, and send your pump in. We will thoroughly clean it, replace all wear items and seals, treat it to a cosmetic restoration, pressure test it, and return it to you.

### Eaton Pumps

When shipping your Eaton pump core, do not send the reservoir. Your remanufactured pump will not include a reservoir. Only the pump is being remanufactured. This note only pertains to Eaton pumps. Eaton pumps were made in 2-styles. They are referred to as "front mount" and "rear mount". These are not interchangeable.

Please enter the part number of the pump you need on MacsAutoParts.com, then check out. A form with shipping information will be emailed within hours.

## Lowered Coil Springs

New lowered coil springs are custom built to allow lowering your classic Ford from one to three inches. We have our coils built using the original Ford print specifications for load and height and have engineered the springs to the lowered height without compressing or cutting a coil. These are made the right way. Get your lowered leaf springs to go with them for the ultimate lowering package. Specify 1, 2, or 3 inch drop when ordering. Custom made, please allow 2-3 weeks for delivery. Made in the USA!

## Phantom Series Front Coilover Kits

- Replaces factory shocks with ride height adjustable coilovers
- Significantly improves handling, ride quality, ride comfort, and traction,
- 100% Bolt-on design using OEM mounting locations with no modifications required

Aldan American's Phantom Series kit is designed to convert stock suspension into a performance coilover system. Aldan coilover shocks are machined from 6061 billet aluminum providing a light weight, high strength solution for reducing unsprung weight and improving overall vehicle handling. Complete front coilover shocks and springs are included. This kit is engineered to be 100% bolt-on. Aldan Phantom Series, single adjustable coil-overs offer multiple adjustment settings to fine tune your ride. Front coilovers offer 6 compression adjustments. Adjustable shock valving increases traction and improves handling and ride comfort. Aldan coilover shocks are ride-height adjustable, allowing you to properly lower your ride-height up to 2.0". Aldan 550 lb. High tensile, high travel coil-springs provide a smooth ride for the street and light track use.

## Front Disc Brake Conversion Kits

Complete front disc brake conversion kit for Fairlanes, Torinos, Montegos, and Rancheros. This super value kit has everything you need to totally convert a production drum brake equipped car to factory 4-piston disc brakes. All parts are new and made exactly to original specifications. This 45-piece kit comes complete with detailed installation instructions and can be installed in a mere 4 hours! Must have 5 lug wheels. We recommend professional installation. Note: original steel wheels may not work with this kit. May not clear 14" wheels. This part not eligible for volume discounts.

Kit includes: rotors, calipers, master cylinder, proportioning valve, wheel bearings, flex hoses, brake pads (organic), all necessary mounting hardware.

## Bolt-On Disc Brake Conversion Kits

This kit features special adapter plates that let you utilize your car's stock spindles. The advantage to this is that you do not have to remove the spindle and do not have to have the front end re-aligned, saving time and expense. Additionally, this kit uses a smaller, lower profile caliper that allows the use of most factory 14" wheels. This kit works with the factory 5-lug drum brake applications only. All disc brake kits come with detailed instructions and will require custom lines to be run from the master cylinder to the calipers. Comes with detailed instructions, but we recommend professional installation. Proportioning valve is not included, must order separately. Dust shields included only if required.

## Brake Booster/Master Cylinder Conversion Kit

This great kit is just the ticket to firm, safe brakes with an original look. The booster and associated bracketry are black, and finished well. The 'teardrop' master cylinder has a generous 1" bore which will provide more than enough hydraulic capability for nearly all braking systems. This is designed for disc/drum combinations but can be used for 4-wheel disc brakes. You will need to use some-type of proportioning valve if your vehicle has any-type of disc brakes. We have several options available.

## Drum Brake Self Adjusting Kits

Self-adjustment takes place when the vehicle is in reverse and the brakes are applied, or when the parking brake is engaged. The cable or link attached to the anchor pin pulls the lever mechanism based on the movement of the secondary brake shoe. Wear prevents this from happening. These kits include all parts needed for proper function.

## Carburetor Rebuild Service

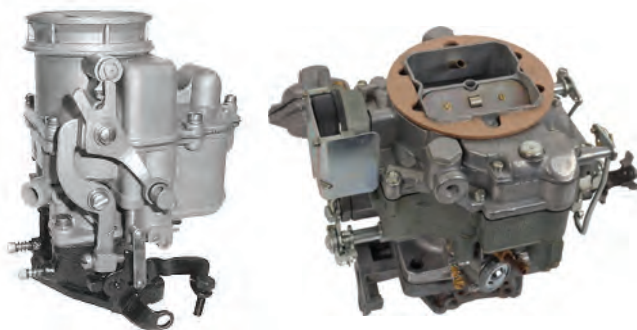

Which is worse on a carburetor, years of rough service, or sitting around a garage while old gas turns to varnish in tiny jets, ports and orifices? Who knows? But we do know that these top quality rebuilt carburetors will eliminate all of those typical carburetor problems and provide you with smooth, reliable performance for years.

Send US your carburetor to be professionally rebuilt. We have looked for years for a high-quality rebuilder to come forward and stand behind their craftsmanship and we've finally found exactly that! These units return live-engine tested and restored to an OEM appearance and include:

- Master rebuild kits installed
- Floats
- Needle and seat
- Gaskets
- Choke cover
- Fuel filters (when originally equipped)

Since we have no cores, we must rebuild your exact carburetor. Send US your complete rebuildable unit and we will completely clean, inspect and rebuild it. Include your daytime phone number so we can contact you if necessary. Usual turnaround time is 3 to 4 weeks from the date we receive your core.

The rebuilding price listed below assumes the entire assembly is intact and in decent condition. If any major parts are missing, if the unit is not rebuildable, or if the cost will be greater than the prices listed below, we will advise you.

## Holley Street Warrior Universal 600CFM Carburetor

- Performance upgrade for stock to mildly modified V8 engines
- Calibrated for excellent street performance right out of the box
- Vibratory polished aluminum for good looks and long lasting shine

Holley has been the world leader in carburetors for over 100 years. We are proud to announce the newest member of our carburetor family- the street warrior. The goal in designing the street warrior was to take all of those years of experience and build the ultimate performance street carburetor for your daily driver that would not break the bank. Don't let the low price fool you. The street warrior uses the latest technology and quality products that Holley is known for. Constructed from aluminum and calibrated to run great right out of the box. The street warrior is a great replacement carburetor for your daily driver or your weekend cruiser. Perfect replacement carburetor when your original-style is no longer available. Replaces Holley, Edelbrock, carter AFB, and Autolite-style carburetors with 5-3/16" x 5-5/8" bolt pattern.

## Mr. Gasket Fuel Line For Holley 4160 Series Carburetors

- Chrome plated 3/8 in copper
- Hex design fittings
- Fits most Holley 4160-style carburetors with primary metering block and secondary metering plate

This is the perfect fuel supply line for dual-inlet Holley 4bbl 4160 series carburetors. It has generous 3/8" tubes to supply plenty of fuel, and the threaded fittings have the necessary 8-21/32" centers for the 4160. The bright chrome plating of the gas line kit adds the special "touch of class" to your engine compartment.

It's constructed with copper tubing, brass fittings and silver brazed connections. The "hex" design provides wrenching area for easier installation of fittings. It does not include inverted flare fittings. If your carburetor requires 7/8-20 threaded inlet, please use Holley part# 26-26 fittings

## Carburetor Secondary Diaphragm and Actuator Arm

Since the 4100 series 4-barrel carburetors are now around 60 years old, it stands to reason that most have been rebuilt. Sometimes the rebuilders might have used what they had available, correct or not. The "early"-style has a steel secondary diaphragm actuator arm and the "late"-style has a plastic arm. The "early"-style secondary diaphragm is no longer available, but you can use the "late"-style as long as you replace the steel actuator arm with the "late"-style plastic arm. Please take a look at the actuator arm so you know exactly what you need before placing your order.

## Needle and Seat

This new design needle and seat will cure the many ills of a conventional needle and seat. It helps to eliminate "flood over," dirt and rust sticking to the needle and gives more consistent fuel level. All this adds up to better fuel economy and as an added bonus, it will outlast any currently available needle and seat. It is precision made and the inverted flare seat provides positive sealing and improved fuel control. The needle contains a high quality "fluoro-carbon" alcohol resistant rubber disc that rotates in the end of the needle, thus insuring a positive seal every time.

## Champion Three Row Aluminum Radiators

- Fittings and billet fill neck
- High efficiency 14-16 louvered fins per inch and 3/8" spaced tubes

Step up to Champion aluminum high-efficiency radiators. Aluminum is a far superior metal to the original equipment (OEM) copper-brass because it dissipates heat much more quickly and cools down much more rapidly. Transferring heat from your engine to the atmosphere, thereby lowering the temperature of the engine coolant is the sole purpose of a radiator, and an aluminum radiator will out-cool a copper/brass radiator of similar size and construction by at least 40%. They are 50-75% lighter than your brass/copper radiator as well.

## Cold Case Aluminum Radiators

- The tanks are polished, this usually costs extra
- Corrugated fins that give more surface area and more thermal transfer
- Limited lifetime warranty

These radiators have the correct-style stampings, are original appearing, and will fit your core support like the factory radiator. If you decide to paint it, you'd be hard pressed to find someone who would prefer an original over a cold-case. Cold-case aluminum radiators are 50-75% lighter than your factory copper and brass radiator unit and cool up to 40% better.

## Griffin Aluminum Radiators

Aluminum radiators manufactured to the strictest tolerances.

Not only are they Heli-arc welded and vacuum brazed, but the core is reinforced with a special high temperature epoxy that provides tube to header strength and helps prevent vibration failure. This process is q-1 approved by the Ford motor company, one of the toughest standards in the industry. All radiators are 2 row, and feature either 1" or 1-1/4" tube cores. Ask your sales person for details. These radiators are 100% manufactured in the USA.

## Cooling System Zinc Anode

Sacrificial anodes guard against cooling system corrosion and are created from a metal alloy with a more negative electrochemical potential than the other metal it will be used to protect. The sacrificial anode will be consumed in place of the metal it is protecting, which is why it is referred to as a "sacrificial" anode. This will protect aluminum most of all but also cuts down on steel corrosion. This one is simple to install. Simply remove the radiator petcock or plug, and screw this in. Not all radiators have the 1/4" npt 'bung' for a petcock so make sure yours does before you order this great item.

## Thermal Fan Clutches

Engine overheating? A/C and heater systems performing poorly? Then you just might be in the market for a new thermal fan clutch. The purpose of the thermal fan clutch is to engage and disengage the fan based on temperature to prevent overheating, loss of engine power and poor performance of the heating and cooling systems. Fan clutches start to lose their efficiency after about 40,000 miles and/or 5-10 years of service. Replacement is suggested beyond these intervals.

## Thermostat Housings

Thermostat housings are usually made of cast aluminum and can therefore suffer serious internal pitting if old antifreeze is allowed to degrade over time and become corrosive. Leaks are common at the gasket and hose connection areas of these small housings, especially if this corrosion has eaten away at the gasket flange areas. This condition might require nothing more than new gaskets and sealer. But if corrosion and pitting are present, you might need to replace the entire thermostat housing with one of these quality units.

## Torino/Ranchero Air Conditioning POA Valve Upgrade with R134 Refrigerant Fitting

- Replaces and upgrades original POA valves
- Connects system to modern cycling clutch-type systems
- Eliminates the problem of sticking internal pistons

This kit is a must for all vehicles with an original valve. The update includes a pressure cycling switch, o-rings, wiring harness and fitting to replace the original poa valve with ports to attach the oil bleed line and expansion valve equalizer tube.

## Rotunda Dash Tachometer

We now have excellent reproductions of the original Sprint, Rotunda and Caliente dash mounted tachometers used on 1963-65 Falcons, Rancheros and Comets. These Rotunda versions can also be used on any model Ford or Mercury as an add on accessory since they were originally available over the parts counter. They function and are manufactured like the originals too with a die-cast metal body and stainless steel front ring and back plate. Mounting hardware and a factory one year warranty are included.

62-79 .....**42-77571<sup>A</sup>** **399.99** ea.

## Tachometer Filter

Installed between the tachometer and the ignition trigger source (usually the coil) this filter traps, redirects, and dissipates the high voltage spikes and surges that are emitted by any late-model high-energy ignition system. Also modifies the sharp up-and-down spikes into a semi-square wave signal for steady pointer readings and faster pointer response. Three color-coded wires allow fast and easy fool-proof connections for life-time protection and superior response on all classic tachometers.

62-79 .....**42-74728** **28.99** ea.

## Fairlane Tachometer Mounting Plate and Insulator

Mounting plate is the small plate used to mount the factory dash tachometer on the dash pad. We now have the original-style tachometer base and replacement insulator for all dash mounted tachometers.

## Headlight Sockets and Wires

How many times have we all seen gorgeous cars at various events with weak or unmatched lights? It makes an otherwise nice car seem "half-baked," yet it is so easy to fix this simple problem. For example, when you see a car with one bright and one dim headlight, the problem is usually a bad ground. Often with a new headlight socket with new wires securely connected and grounded, this nagging problem will go away forever. 2 Required.

## Magnum 500 Wheels

Our customers rave about our Magnum 500 wheels. Our Magnum 500 wheels are the best on the market, not a lower priced inferior product. Our wheels are correctly centered and welded completely around all surfaces. We use the correct shade of semi-gloss black paint and triple chrome plate them to perfection. Manufactured in the USA! Original Magnum 500 wheels were riveted, and not welded. Wheels must be welded to meet current dot specifications.

### Lowest Price Guarantee

MAC's Guarantee is simple: You always get the best quality parts at the lowest price! Show us the identical item advertised in any current magazine, catalog, or website and we'll match our competitor's current price, guaranteed! This offer is available only at the time of purchase and applies to in-stock merchandise only. We can't combine this with any other offer. Tires, restoration services, kits, window glass, cores, reproduction batteries, certain engines, transmissions, used parts, special order parts, and shipping and handling charges are excluded.

### Find the Latest Prices on our Website

Prices in this catalog were correct at the time of printing but are subject to change. Visit [MacsAutoParts.com](http://MacsAutoParts.com) for the latest up-to-the-minute pricing as well as hundreds of items not appearing in this catalog. MAC's is not responsible for pricing changes, errors, or omissions in this catalog or online. Prices are subject to change without notice.

### 100% Satisfaction Guaranteed

Our commitment to you: If for any reason you are not 100% satisfied with any of our products, return them for a full refund, credit or exchange—your choice.

### Best Parts, Best Price

This is not just a slogan! MAC's is committed to providing the highest quality parts at the most competitive prices. We source and select all of our parts exclusively from the world's leading brand name manufacturers using our massive buying power. This means you get the best there is, at the best prices in the market today.
